DETAILED ACTION

Allowable Subject Matter

1. Claims 1-16, 18-45 and 47-66 allowed.

The following is an examiner's statement of reasons for allowance: Independent claims 1, 31, 38, 53, 54 and 63-66, when considered as a whole, are allowable over the prior art of record. Specifically, the prior art of Gray teaches the limitation: "using features from a wireless device to build the statistical signal model". But the claims recite a different combination of limitation: (using what is learned from the user) "learning user behavior...anticipate availability of the one or more other wireless devices" (claim 1, 64,66), "determines expected availability based on past usage"(claim 31,53) and "determining trends from prior user action when accessing wireless devices"(claim 38,54,63,65) ", that is not suggested or shown by Gray. Further Tang and Smith are introduced that teaches a detection component that automatically extends its range. But the claims recite a different combination of limitation: "learning user behavior...anticipate availability of the one or more other wireless devices" (claim 1, 64,66), "determines expected availability based on past usage"(claim 31,53) and "determining trends from prior user action when accessing wireless devices"(claim 38,54,63,65) ", that is not suggested or shown alone or in combination by Gray in view of Tang in further view of Smith.

The dependent claims further add limitations to the allowable subject matter of the corresponding independent claims; thus are also allowable. Therefore the claims are allowed over the art because the claims differ in scope that is not seen or suggested by the prior art.
